Swissgear Pegasus 17" Backpack

[Order code: 5333091](#)

With its inherent strength, durability and comfort, the Swissgear Pegasus is the perfect backpack for anyone with a large load to carry. With space for a 17" laptop plus files, chargers, cables and all your travel essentials, the Swissgear Pegasus offers a considerable amount of storage yet its clever design gives great comfort and fit, even when fully packed.

Superior protection for your laptop

Keeping your laptop safe is a priority for any good laptop bag and the Swissgear Pegasus is no exception. It features a padded computer pocket that fastens with a Velcro strap to keep your laptop safe and secure. Alongside the computer pocket sits an additional compartment for storing your mouse and leads.

Designed for travel

The Swissgear Pegasus provides a range of features that will add comfort and convenience to your journey. A stabilising platform in the base keeps the backpack upright ensuring that your laptop and other belongings stay securely in place. However, the base can be tucked up when not needed, making the overall size more compact. And whilst it can hold an impressive amount of gear, the Swissgear Pegasus complies with most airline size restrictions for hand luggage.

* At the rear of the backpack you'll find a useful hanging handle that doubles as a trolley strap.

Everything in its place

With the Swissgear Pegasus, you'll never have a problem finding a particular item. The wide range of different pockets provides a place for everything. There are compartments large enough for carrying A4 folders whilst the 'essentials organiser' at the front includes a selection of small pockets for all those essential items such as mobile phones and keys whilst the side mesh pockets provide even more storage options.

Quick pocket

A particularly useful compartment is the Swissgear Pegasus's Quick Pocket. Located towards the top of the backpack, this pocket gives you easy access to the items that you need to keep close to hand and includes a handy music pocket specially designed to carry your iPod or MP3 player.

Ultimate Comfort

The Swissgear Pegasus features a dual handle system giving you versatile carrying options. When carrying in the traditional backpack style, the adjustable shoulder straps give great comfort and fit whilst their shock-absorbing quality distributes weight evenly.

Alternatively, you can carry the Swissgear Pegasus using the reinforced ergonomic handle on the top. This is perfect for those times when it's more practical to carry the backpack by hand such as when boarding a plane or train.

Keep your cool

When you're on the go it's important to keep cool and comfortable. With this in mind, the Swissgear Pegasus features air-flow back padding to increase the air-flow between your body and the fabric. This keeps your back cool - even when you're carrying a full pack.

Quality guaranteed

The Swissgear Pegasus is designed by Wenger, the makers of the Genuine Swiss Army Knife™. The same innovation, quality and attention to detail that are inherent to the iconic knife are incorporated into all Wenger products including the Swissgear Pegasus backpack.

Built to last

The Swissgear Pegasus has been carefully crafted to give you years of use and is supported by a limited lifetime warranty that ensures worry-free usage throughout the life of the product.

SWISSGUARD protection

One of the most important functions of a good laptop case is to protect your computer from accidental damage. To ensure this, the Swissgear Pegasus features the superior SWISSGUARD protection system. The triple-layer foam shields the corners and increases shock absorption to keep your laptop and other belongings safe.

Premium materials

The Swissgear Pegasus is made from high-quality materials that will maintain their good looks for years to come. And with enhanced durability, the robust fabric can sustain the rigours of day-to-day use without showing signs of fatigue.

* Permitted size for hand luggage of most airlines:

Size (DxWxH): 9.8" x 22" x 17.7" / 25 x 56 x 45 cm NOTE: Some airlines may vary from standard size limit.
